

About the Laboratory's People and Programs

Lawrence Livermore National Laboratory's principal asset is its quality workforce. Through a long association with the University of California, the Laboratory has been able to recruit a world-class workforce and sustain a tradition of scientific and technical excellence. With about 8,000 employees, Livermore has an essential and compelling core mission in national security and the capabilities to solve difficult, important problems.

FY 1999 Budget: \$1.36 Billion

A Quality Workforce

The Laboratory seeks a highly talented, productive, motivated, flexible staff that is committed to Livermore's goals and reflective of the diversity of California and the nation. We strive for a work environment in which all employees can contribute to their fullest and feel valued for their role.

The Laboratory's programmatic achievements would not be possible without the dedicated, high-quality efforts of all employees. The Laboratory greatly values the outstanding scientific and technical achievements of its scientific, technical, and administrative staffs. Their breakthrough accomplishments are critical to the success of Livermore's programs and provide the foundation for future programs to meet national needs.

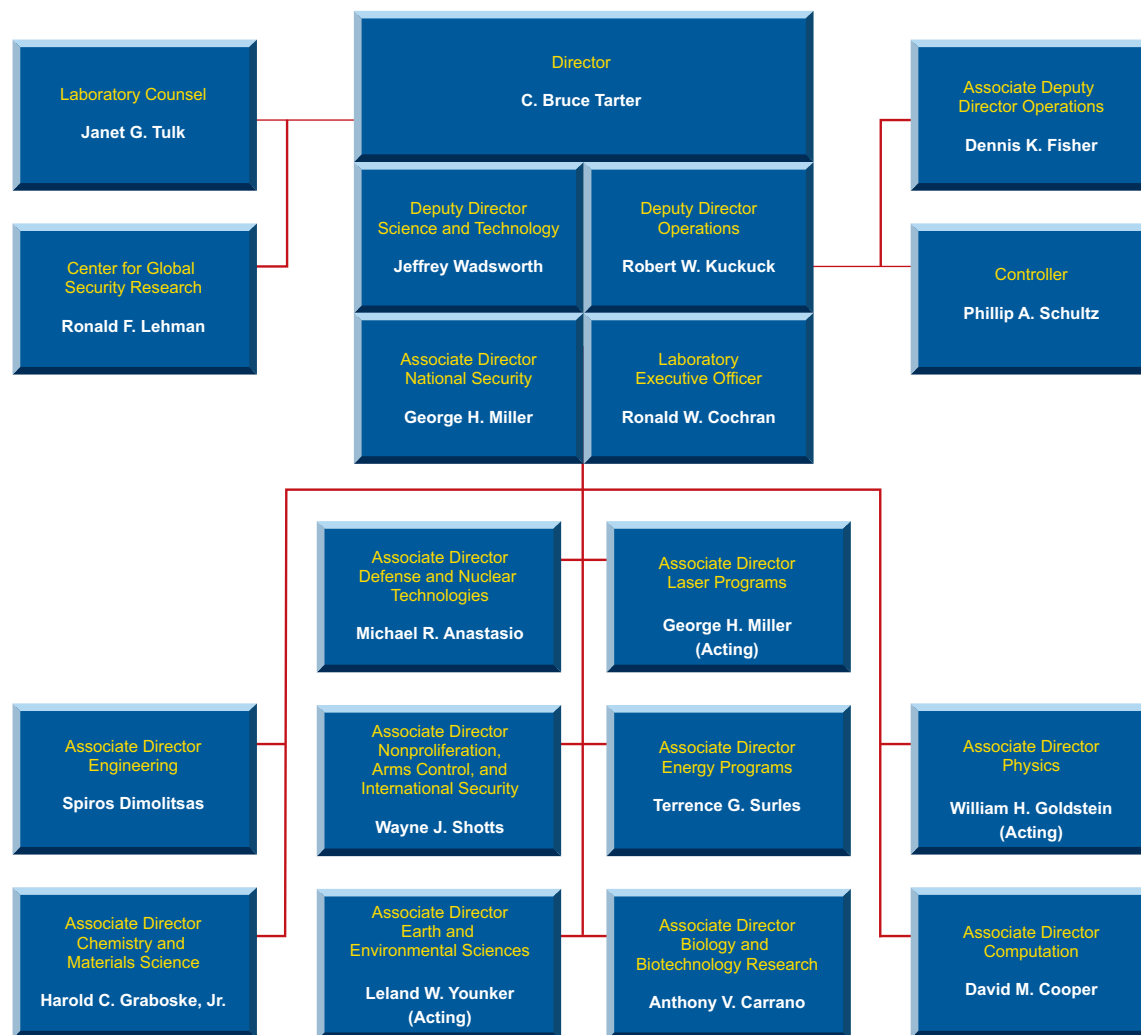

Laboratory Program Budget

Most of Livermore's \$1.36-billion budget for fiscal year 1999 was designated for research and development in program areas supporting the Department of Energy's missions.

As a national security laboratory, we are part of DOE's National Nuclear Security Administration (NNSA). We receive most of our funding from the NNSA Office of Defense Programs for stockpile stewardship. We also receive funding from the NNSA Office of Defense Nuclear Nonproliferation, various Department of Defense sponsors, and other federal agencies for national security work.

As a multi-program laboratory, we apply Livermore's special capabilities to meet important national needs. Activities are pursued for other DOE programs, principally Environmental Restoration and Waste Management,

Fissile Material Disposition, Nuclear Energy, and Science. Non-DOE sponsors include federal agencies (such as the National Aeronautics and Space Administration, Nuclear Regulatory Commission, National Institutes of Health, and Environmental Protection Agency), State of California agencies, and industry.

Livermore Publications

Visit our Web site at <http://www.llnl.gov/> to learn more about our many scientific and technical programs and to

discover opportunities for employment, academic research, and industrial partnerships. Read about our accomplishments each month in *Science & Technology Review* on the Web or in print. Both *S&TR* and our *1998 Annual Report* were award winners in the Society of Technical Communication's 1999 international competition.
